

# Anshu Mishra

+91 8240450800 | West Bengal, India | anshumishraocog@gmail.com | LinkedIn | GitHub | Portfolio

## OBJECTIVE

Full Stack Developer with strong problem-solving skills and experience building scalable web applications, real-time communication platforms, and AI-driven systems. Passionate about product development, backend engineering, analytics, and innovative technology solutions.

## EDUCATION

### Techno India University

B.Tech in Computer Science (AI & ML) – GPA: 8.7 / 10.0

Kolkata, West Bengal

2022 – 2026

- Relevant Coursework: Database Systems, Operating Systems, Data Structures & Algorithms, OOP, Computer Networks, AI/ML, Cloud Computing

## SKILLS

|                   |                                                                      |
|-------------------|----------------------------------------------------------------------|
| Frontend          | React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, ShadCnUI     |
| Backend           | Node.js, Express.js, REST APIs, JWT Authentication, Socket.IO        |
| Databases         | MongoDB, MySQL, Firebase                                             |
| Programming       | JavaScript, TypeScript, Python, C++, SQL                             |
| ML / DL           | Scikit-learn, XGBoost, TensorFlow, Keras, Pandas, NumPy, SHAP        |
| Tools / Platforms | Git, GitHub, Postman, VS Code, Figma, Android Studio                 |
| Concepts          | OOP, Data Structures & Algorithms, WebRTC, API Design, System Design |

## EXPERIENCE

### Smart India Hackathon 2023 – Participant

Sept 2023

Techno India University

- Qualified the internal university round at Smart India Hackathon 2023.
- Developed an AI-powered Android chatbot using React Native and the Gemini API for coal mining-related queries.

### Group Projects

2022 – Present

Techno India University

- Designed secure real-time communication systems using WebRTC and Socket.IO.
- Built scalable full-stack applications with authentication, media handling, and responsive UI/UX.

## PROJECTS

### Threadly – React.js, Node.js, Express.js, MongoDB, RTK Query, ShadCnUI

Live Demo

- Engineered a full-stack anonymous social media platform supporting text, image, and video content.
- Implemented secure JWT authentication with OTP-based email verification, role-based access control, and Cloudinary-based media uploads.
- Optimised API interactions using RTK Query and designed a scalable backend architecture.

### Zynk – React.js, WebRTC, Socket.IO, Node.js

Live Demo

- Developed a peer-to-peer video conferencing platform with real-time video/audio communication and chat functionality.
- Implemented WebRTC signalling and media stream management for low-latency communication, secured with JWT authentication.

### DailyDrift – React.js, Firebase, Recharts

Live Demo

- Built a habit-tracking application with an analytics dashboard visualising 30-day performance trends via charts and heatmaps.
- Integrated Firebase Authentication and Firestore for real-time data management.

### Hybrid Network Intrusion Detection System – Python, TensorFlow, XGBoost, Scikit-learn, SHAP

GitHub

- Developed a hybrid intrusion detection framework using Autoencoders and XGBoost on the NSL-KDD dataset for multi-class attack classification.
- Performed preprocessing, feature engineering, model evaluation, and explainability analysis using SHAP.

## CERTIFICATIONS & ACHIEVEMENTS

- Machine Learning Specialization – Andrew Ng, Coursera
- SQL (5-Star Gold Badge) – HackerRank
- Solved 300+ Data Structures and Algorithms problems across LeetCode, GeeksforGeeks, and HackerRank
